In presenting our Garden Seed List, we do so with confidence that the stocks are the very best. They are carefully grown by experts, in the World's most favored locations, and may be used by the most critical trade. We do not buy from any one grower, but from those who in our opinion produce the best stock of each item. In the Field Seed Line our stocks are well cleaned and uniform, and we are prepared to follow the Federal Seed Law which is now beginning to function. We are also in position to follow the regulations of any State Seed Law.
